Amendments to the Specification:

Please amend the title to read:

"Method of Making An Angled Conductor Electrical Connector"

Appl No.: 10/627,119  
Reply to Office Action of: 11/12/2004

Please replace the Abstract section with the following new abstract section:

Abstract

A method of manufacturing an angled conductor electrical connector including extruding a metal member having a channel therein; and bending the metal member such that the channel forms two angled conductor receiving areas. Each conductor receiving area has a channel axis angled relative to each other.
